

SABA SAYED

DevOps Engineer / Site Reliability Engineer (SRE)

Sharjah, UAE | +971 52 175 3424 | sabahatp0728@gmail.com | linkedin.com/in/sabahat-sayed
Nationality: Indian | Visa Status: Dependent (Spouse) Visa – UAE, Transferable

PROFESSIONAL SUMMARY

Site Reliability Engineer / DevOps Engineer with 7+ years of overall IT experience, including 4+ years specializing in DevOps, cloud infrastructure, and platform operations across AWS and Azure. Proven track record managing production-grade Kubernetes (EKS) clusters, building CI/CD pipelines with Jenkins and GitHub Actions, and automating infrastructure using Terraform and Infrastructure-as-Code practices. Skilled in monitoring and observability (Prometheus, Grafana, ELK Stack, CloudWatch), incident management, root cause analysis (RCA), and 24x7 production support, with a strong focus on system reliability, high availability, and reducing MTTR. Currently based in the UAE and available to join immediately.

CORE SKILLS

Cloud Platforms	AWS (EC2, EKS, S3, IAM, CloudWatch, VPC), Microsoft Azure
Containers & Orchestration	Docker, Kubernetes, AWS EKS, Helm
CI/CD & Automation	Jenkins, GitHub Actions, AWS CodePipeline, Gitlab, Terraform
Monitoring & Observability	Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch
Scripting & Programming	Python, Shell Scripting
Operating Systems	Linux Administration (RHEL, Ubuntu, CentOS)
SRE & Operations	Site Reliability Engineering, Incident Management, RCA, High Availability, 24x7 On-Call Support, Production Support

PROFESSIONAL EXPERIENCE

DevSecOps Engineer – Ghostly Solutions, Dubai

Feb 2026 – Present

- Administer and manage production Kubernetes (AWS EKS) clusters, ensuring high availability, scalability, and reliability for business-critical workloads.
- Implemented end-to-end monitoring and observability using Prometheus, Grafana, ELK Stack, and CloudWatch, improving visibility into system health and performance.
- Reduced Mean Time to Recovery (MTTR) by ~30% by introducing proactive alerting, structured runbooks, and streamlined incident response processes.
- Automated infrastructure provisioning and configuration management using Terraform (Infrastructure as Code) and Shell Scripting, improving deployment consistency and reducing manual errors.
- Supported Linux production environments and participated in 24x7 on-call rotations, leading incident management and root cause analysis (RCA) to minimize downtime.
- Collaborated with development and security teams to embed DevSecOps practices across the CI/CD lifecycle.

DevOps Engineer – RecodeWorld Advertising LLC, Dubai

Nov 2022 – May 2025

- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions, accelerating release cycles and improving deployment reliability.
- Deployed and supported containerized applications on Docker and Kubernetes, ensuring stable operation of production workloads.
- Automated recurring operational tasks using Python and Shell Scripting, reducing manual effort and improving team efficiency.
- Standardized infrastructure provisioning using Terraform, improving consistency across environments.
- Monitored and troubleshooted production issues using ELK Stack and Grafana, contributing to improved system stability.

EARLIER EXPERIENCE

Web Developer Analyst – Accenture, *Mumbai*

2018 – 2022

- Developed and maintained web applications and internal tools using PHP, HTML, CSS, and JavaScript for enterprise clients.
- Performed analysis, troubleshooting, and bug fixes to ensure smooth functioning of production web applications.
- Collaborated with cross-functional teams to gather requirements and deliver web-based solutions within project timelines.
- Provided application support and maintenance, ensuring minimal downtime and timely resolution of issues.

Junior PHP Developer – Renown Web

2016

- Developed and maintained PHP-based websites and web applications, covering both front-end and back-end components.
- Wrote and optimized MySQL queries to support application functionality and data management.
- Assisted senior developers with debugging, testing, and deploying web applications.
- Built foundational experience in web development practices, version control, and the software development lifecycle.

EDUCATION

Bachelor of Engineering in Computer Science
